

7 STEPS IN CHOOSING A PARKING SOFTWARE PROVIDER

1. COST

- Are there different costing structures to suit your needs?

2. PAPERLESS

- Does the software provide you a paperless approach?
- This is especially important during the COVID-19 pandemic.

3. REVENUE GENERATION

- Is there an ability to generate parking revenue for you?

4. SECURITY

- Is the data secure?
- What measures does the software provider take?

5. CUSTOMIZATION

- Can the software be customized to suit your needs?

6. EASE OF REGISTRATION

- How are the users registering?
- What information is being asked to save time and assist with approvals?

7. MULTILINGUAL SOLUTION

- Is the system set up to communicate and display multiple languages for better usability?

At ParkingPass.com, we are able to say **YES** to all of these questions, and hopefully other parking software providers you are considering can too.

Should you have further questions or need more information, contact us at sales@parkingpass.com or call (800) 322-5535.
